

## *Beverly Hills Fire Department Presents: "Don't Fear the Firefighter Gear"*

Firefighters can look a little scary in their firefighter protective gear. They look big and bulky. They have a big helmet and wear a mask that makes loud breathing noises like "Darth Vader." All the equipment is there to protect them from the fire and breathe while in the dark smoke, so they can rescue you! Underneath all that stuff is a nice person who is there to save you. So if there's ever a fire in your house, don't hide or be scared of them, go to them! They are here to protect you!

When there is a fire and you call 911, this is who will respond. Don't fear...it's only firefighter protective gear. Firefighters are Friends! They are here to help your friends, family, and YOU!!!!
